

Established in 1979, JHQ is the official journal of the National Association for Healthcare Quality (NAHQ). Its audience is the quality professional in healthcare responsible for promoting and monitoring safe, cost-effective, evidence-based care. JHQ articles address all facets of quality across the continuum of healthcare delivery, including continuous quality improvement, total quality management, disease management, utilization management, care management, and managed care. Articles on meeting, exceeding, or anticipating standards and practices as defined by private accreditation agencies and by state and

federal regulatory organizations are featured. JHQ also includes reviews of new media (books, video, software, CDs), new products, and Internet sites of potential interest to quality professionals in healthcare. Together, these articles and reviews provide comprehensive coverage of

- New research in the art and science of quality management
- State-of-the-science technology
- Quality management principles and techniques
- Utilization of quality improvement tools
- Quality management innovations.

Articles have focused on the art and science of healthcare quality on topics that include the following:
